THIS IS A DEPARTMENT OF DEFENSE COMPUTER SYSTEM.

This computer system, including all related equipment, networks, and network devices (specifically including Internet access), is provided only for authorized U.S. Government use. DOD computer systems may be monitored for all lawful purposes, including ensuring that their use is authorized, for management of the system, to facilitate protection against unauthorized access, and to verify security procedures, survivability, and operational security. Monitoring includes active attacks by authorized DOD entities to test or verify the security of this system. During monitoring, information may be examined, recorded, copied, and used for authorized purposes.

All information, including personal information, placed or sent over this system may be monitored.

Use of this DOD computer system, authorized or unauthorized, constitutes consent to monitoring of this system. Unauthorized use may subject you to criminal prosecution. Evidence of unauthorized use collected during monitoring may be used for administrative, criminal, or other adverse action. Use of this system constitutes consent to monitoring for these purposes.

Important Notice
Department of Defense (DoD)
Public Key Infrastructure (PKI)

DoD has mandated that all personnel who access DoD systems must use PKI for all private web-enabled applications. By 9 June 2008, you will be **required** to have a DoD-approved PKI or External Certificate Authority (ECA) certificate to access this site. [To learn who to contact to obtain a DoD-approved certificate click here.](#)

The DoDAAC query allows searching on every field in the table. Each new value is a logic "AND". This means if you enter a state, you can narrow your search by also adding a city. More about this later...

There are two types of wildcard searches available:

- Percent sign '%' is for any number of characters
- Underscore for a single character.

Since the % is pretty intuitive, here is an example of how to find DoDAACs that start with "S" and end with "A". Here we have entered "S__A"...
